

Title: IA Training and Healing with Voice of the Martyrs in Colombia, #2

June 2, 2009

Greetings all,

Yet another testimony note regarding the healing work the Lord is doing. We just got another note from Kim Campbell, the medical director for Voice of the Martyrs. More good news regarding the Lord's healing work in the lives of the Columbian widows, as you can see from the excerpts below:

“...The last two widows' groups were as successful as the first one. **All reported major healing and much improved quality of life and ministry.** One case stands out in particular. In the VOM article, in the center of the text is a small picture of a woman drying her eyes. Later on in September she experienced great healing, and then returned back to her home area. She had become so effective that the FARC Marxist guerrillas sent a hit man out to do her in. He made three attempts. On the first he was going to shoot her when she came out of church. However, when she did he observed that her feet did not touch the steps, as if she floated down the steps. This so unnerved him that he abandoned the hit. On the second attempt she was surrounded by a large group of Christian ladies, so much so that he could not run her over with a car. So on his third attempt he came to the church and asked for her by name. The ladies with whom she was praying began praying louder and more earnestly for her protection. She took the young man back into a private area, where he produced a gun and held it to her temple. She closed her eyes and prayed, but after a short while, realizing nothing happened, she opened her eyes to see him down on his knees crying and telling her he wanted what she had (Christ). She led him to faith, and then they both fled because he was in danger because of his failure and she remained in danger. He is now studying to be a pastor in another Latin country.

Elizabeth said this would have been impossible had not she experienced the healing she did last September.

So in this most unscientific of studies, we saw 19 of our original 47 widows, and 100% [of these women we were able to follow-up with] reported lasting healing. In addition we prayed with three other women, and were successful in all three cases. One young women said this was the first real peace she had experienced in 8 years.

I return to Colombia in late July to do another widows' ministry, and then again in October to finish organizing a Colombia-wide ministry to widows that combines Immanuel and vocational training....”

As you can see, the Lord is caring for these women who have suffered for His work. We ask that you would pray for VOM, and specifically for Kim as he works to develop a larger program to

provide similar ministry to many others (in addition to the widows in Columbia, he is also working with 800 widows in Nigeria).

Thanks for your prayers, and blessings,

Dr. Lehman/Karl
