

Title: "Overwhelmingly Positive Response to Webinar"

May 30, 2018

Greetings all,

Just a quick follow-up note to let you know how the webinar went.

The good news is that there was an overwhelmingly positive response with respect to participation numbers, and the webinar went really well with respect to content flow. I think this is now the best recording we have of a brief (one-hour) summary of the Immanuel Approach.

The bad news is that we totally overloaded the system. The maximum capacity for the webinar system we were using is 101 participants, and we ended up with 652 people registered. So there were a LOT of people who couldn't get into the system for the live streaming event.

More good news is that the webinar was recorded. If you were registered, watch for an email from GoToWebinar that should come later this afternoon. It should have what you need to access the recording. For those of you who did not find out about the webinar in time to register, we will eventually (probably two to three weeks) have a link to the recording on the "Getting Started" page of www.immanuelapproach.com . I will send out a note when that is in place.

Blessings,

Dr. Lehman/Karl
