

Title "Endorsement Regarding Basic Training Seminar"

November 6, 2019

Greetings all,

Just for fun, here's one of the feedback notes we got after our Basic training seminar in Virginia last spring:

"This conference was SO helpful for putting it all together and seeing and experiencing the process right before my eyes. SO glad to have been a guinea pig for the best version yet, :-)
and I think your brain science method to quickly position us to be able to do this totally worked for me/us. It feels like the whole process is in my head and something I can do (albeit clumsily). The reference materials are easy to use and super helpful, as well."

Blessings,

Dr. Lehman/Karl
