

Title: Special Blessing from Jesus for Person on the Israel IA Team

March 3, 2025

Greetings all,

Just a quick note to share about a special blessing that Jesus provided in a session I facilitated for one of the people on the Immanuel Approach team that went to Israel last winter. This session was from just a few days after she returned, and she was feeling burdened from being with so many people who had been through such horrific trauma so recently:

“Jesus's work during our session regarding the scenes I saw in my mind as people reported their pain was incredible. At the end of my session with you, Jesus began this "back-to-back reel" of one scene after another, showing me where he was in each scene with each person. I was blown away and grateful for how He was with each of them in those terrifying/sad/horrific moments. Some of scenes were from ministry sessions where I was leading in Immanuel prayer as the recipients were describing their trauma, and then experiencing Jesus' presence and receiving ministry from Him. But other scenes were from stories from people that I did not lead in Immanuel prayer. Jesus showed me where He was in all of them.

Even with the ones I had done Immanuel prayer with, their pain had deeply impacted me, and Jesus met me there by showing me where He was with EACH one. During my session with you, the “reel” moved so fast that I could not tell you about it as it was happening, and I was overwhelmed (in a good way) by His beautiful gift, allowing me to see how He was attentive to each person as they endured the trauma. Now, as thoughts and memories of their trauma come to my mind, I see Jesus in each one, caring for them. Attentive, attuned. Now He is IN each of those scenes for me. His presence changes everything.

I am not sure how to facilitate this. It was a surprise gift from Him. I was not even asking for this, but it was the bonus feature at the end of an amazing Immanuel session. He knew the weight I was carrying and the grief and sorrow I held as I left Israel. Showing me His attentive care and presence with them healed the trauma of having walked through such horrific pain with these precious people. We had been out of Israel for 5 days at the time of the session you facilitated for me. Jesus knew I needed to see Him there, and I had not even processed it enough to know that. Not only did it heal the secondary trauma of walking with them, but it also gave me immense comfort knowing that He was with them since I was feeling sad/guilty about leaving.”

Blessings,

Dr. Lehman/Karl
